

Assessment Specification

Computing

Assessment:	2
Assignment Task	2
Overall marks will be awarded according to the following criteria:	2
Resources	2
Grading Criteria	3
General Requirements for Students:	4

Assessment:

Item	Description
Module Title:	Programming for Data Analysis
Module Code:	B9AI001
Module Lecturer (s):	Paul Laird
Programme/Cohort:	MSc Artificial Intelligence
Method of Assessment:	Practical
Percentage (%) Weighting:	60
MIMLOs being assessed:	1,2,3,4,6
Assessment Number:	2
Individual/Group:	Individual
Issue Date:	Week 5
Submission Date:	Week 11
Presentation Date	Week 12
Feedback Date:	Week 15
Feedback Strategy:	In class and Moodle

Assignment Task

You are required to develop a Data Acquisition and Preprocessing Pipeline of your choice, including data acquisition (API, Web scraping, DB Extract etc.), Extraction of features and Transformations as appropriate, followed by loading into an appropriate database. The focus of the complexity of the pipeline is your choice.

Implement and test the System, and document your implementation thoroughly. Testing should at a minimum include unit tests of key transformation functions along one integration test where front and backend interact.

The Colab notebook should be regularly active from week 6.

It is expected that appropriate resources, such as libraries, packages, frameworks and APIs will be integrated into the solution, therefore credit will be awarded for how such material is integrated and augmented with original code. The submitted code must be demonstrably written by the student. Existing resources integrated into your solution must be attributed and presented in accordance with its originating licence (where relevant). Failure to attribute material or presentation contrary to its originating licence will result in Academic Impropriety investigations. A summary of attributions must be included at the end of the documentation.

Code (Colab) must be shared as editor, and documentation should be as text cells in line with the code.

Overall marks will be awarded according to the following criteria:

Implementation:	40%
Documentation:	20%
Presentation (Including answers to technical questions):	40%

Within the above categories, marks will be awarded for:

Interim progress and presentation (Week 8):	10%
Requirements and Design of the System:	10%
Data Acquisition and Ethical considerations :	20%
Transformations:	20%
Loading to database:	20%
Additional Complexity:	20%

Resources

Software or tools required/ useful: Colab

Templates, files, data tables provided by the lecturer: Moodle resources

Below is the *AI in the assessment* table as agreed at College level. This assessment allows use of AI at level **4**, but with specific rubrics appropriate for the programming task at hand:

*The use of AI-generated content is treated in the same manner as the use of any other external resource such as libraries, packages or frameworks. It must be clearly identified and attributed, and credit will be limited to the student's own work, to the exclusion of such resources, except for how students' own code integrates all of these resources. At **the time of inclusion** of AI-generated output in the work, it must be identified, and a separate compilation of prompt-response histories from any AI generator used. Questions will be asked during the presentation.*

1	2	3	4	5
NO AI	AI-ASSISTED IDEA GENERATION AND STRUCTURING	AI-ASSISTED EDITING	AI TASK COMPLETION, HUMAN EVALUATION	FULL AI
The assessment is completed entirely without AI assistance. This level ensures that students rely solely on their knowledge, understanding, and skills. AI must not be used at any point during the assessment.	AI can be used in the assessment for brainstorming, creating structures, and generating ideas for improving work. No AI content is allowed in the final submission.	AI can be used to make improvements to the clarity or quality of student created work to improve the final output, but no new content can be created using AI. AI can be used, but your original work with no AI content must be provided in an appendix.	AI is used to complete certain elements of the task, with students providing discussion or commentary on the AI-generated content. This level requires critical engagement with AI generated content and evaluating its output. You will use AI to complete specified tasks in your assessment. Any AI created content must be cited.	AI should be used as a 'co-pilot' in order to meet the requirements of the assessment, allowing for a collaborative approach with AI and enhancing creativity. You may use AI throughout your assessment to support your own work and do not have to specify which content is AI generated

Grading Criteria

		Evaluative Criteria/Performance Level Descriptors (what does performance at this level look like?)			
Scale	Grade Band	Criterion 1 - “Requirements and Design”	Criterion 2 - “Implementation”	Criterion 3 - “Documentation”	Criterion 4 - “Presentation”
Exceptional	90-100%	Comprehensive specification going far beyond required level of detail	Best practice exemplary implementation	Exemplary documentation	Presentation beyond expectations of level
Outstanding	80-89%	Outstanding specification going beyond required level of detail	Design and implementation of solution Exceeds required standard	Outstanding in clarity and content	Outstanding presentation with comprehensive responses to questions
Excellent	70-79%	Excellent specification of all requirements to a high standard	Excellent solution appropriate for context	Excellent, with no areas of concern	Excellent presentation and responses
Very Good	60-69%	Very good specification of a full set of requirements	Very good implementation of appropriate solution	Of a generally very high standard, complete coverage of work	Good presentation and adequate responses

Good	50-59%	Most requirements well specified	Appropriate solution competently implemented	Most operations well documented	Good presentation, but limitations in questioning
Sufficient	40-49%	Adequate but limited specification, which could include greater detail	Basic Functioning retrieval and storage solution	Some operations could be better documented	Adequate presentation and responses, but could improve
Somewhat/ Unfulfilled	30-39%	Basic specification of some requirements	Non-functioning or inappropriate solution in some aspects	Inadequate or incomplete	Poor presentation or responses to questions
Unfulfilled	0-29%	Absent or poor requirements	Absent or broken	Ad-hoc or absent	Not presented or unable to present competently
MIMLO Alignment (see Module Guide for Minimum Intended Learning Outcomes for Module)					
MIMLO to which criterion is aligned:		1,2	2,3	4	6

General Requirements for Students:

1. All assignments must be submitted no later than the stated deadline (date and time).
2. Assignments submitted after the latest deadline specified (including any approved extension deadline) are considered late and penalised according to the Quality Assurance Handbook (QAH) Part B Section 5.2.2.6 as follows:
 - a. A penalty of 2 marks will be applied per day or part thereof (including weekends and public holidays) for an ongoing failure to submit beyond the submission deadline.
 - b. An examiner has the right to refuse to mark the assignment if the submission instructions have not been observed.
 - c. Where a late assessment is submitted within 14 days of the deadline, and is of a passing standard, the late penalty is capped (such that the minimum grade that can be awarded is 40% for the late submission).
 - d. Where a late assessment is submitted more than 14 days after the deadline, it will receive 0%. The lecturer may, at their discretion, review the submission for feedback.
 - e. Where the assessment is undertaken in a group, the piece of work should be submitted in its complete entirety, and any penalty for late submission incurred applies to all group members.
3. Extensions to assignment submission deadlines will not be granted, other than in exceptional circumstances. To apply for an extension please go to <https://students.dbs.ie/dashboard/SCCM> and open a ticket.
4. All relevant provisions of the Assessment Regulations must be complied with (see QAH B.5).
 - a. Students are required to refer to the assessment regulations in their Programme Handbook, and on the Student Website.
 - b. Dublin Business School penalises students who engage in academic impropriety (i.e. plagiarism, collusion and/or copying, ghost writing/ essay mills, improper use of Generative Artificial Intelligence software).
 - i. Refer to the College's Generative AI Guidelines HERE for further information.
 - c. Guides on referencing are available on the Library website: <https://libguides.dbs.ie/referencing>
 - d. Text-matching analysis software is integrated in Moodle to generate a report regarding the degree of text-matching in a submission.
5. Students are required to retain a copy of each assignment submitted, until the issuing of a transcript indicating the mark awarded and the closure of the Appeal period (2 weeks following the release of final results).
 - a. Results can only be appealed following the release of final results, and the Appeal form must be submitted to the Exams Office within the Appeal period.
 - b. An appeal must be based on valid grounds (see the Appeals Policy QAH B.3.5), dissatisfaction with a grade is not sufficient grounds for an appeal.
 - c. Assignments must be appropriately packaged and presented.
 - d. All assignments should be submitted to your subject/course page on Moodle by the deadline date.

- e. Where a submission involves digital media (i.e formats other than Word, Powerpoint or PDF), it is the submitting students' responsibility to ensure the media is appropriately labelled, fully working and they must retain a copy.
 - f. Components of an assessment which are not included in the final submission cannot normally be subsequently accepted for grading. It is the student's responsibility to ensure their file is uploaded correctly.
 - g. Include an electronic **cover sheet** with the following details to the front of the assignment (see below)
6. Assignments that *breach* the word count requirements will be penalised. *There is a 10% discretion, either way, applicable in terms of word count.*
7. When you submit your assignment you will be asked to click on a button which will declare the following:

By ticking this box I am confirming that this assignment/exam is all my own work. Any sources used have been referenced.

I have read the College rules regarding plagiarism in the QAH Part B Section 3 and understand that penalties will be applied accordingly if work is found not to be my own. All work uploaded is submitted via Ouriginal, whereby a text-matching report will show any similarities with other texts.
